Coding & Solution

Date	12 July 2026
Team ID	xxxxxx
Project Name	Smart Lender
Maximum Marks	5 Marks

Coding & Solution

This section evaluates the quality and completeness of implemented code and the overall solution.

Solution Summary

Field	Details
Repository Link / URL	https://github.com/Nimruja10/Smart-Lender
Programming Language(s)	Python, HTML, CSS
Framework(s) Used	Flask, Scikit-learn, Pandas, NumPy
Key Features Implemented	• Loan approval prediction using Machine Learning • Applicant data input through web interface • Data preprocessing and model training • Prediction of loan approval status • User-friendly web application using Flask
Pending / Incomplete Features	• User Login & Registration • Database integration • Email/SMS notification • Loan history tracking
Setup / Run Instructions	1. Install Python 3.x. 2. Download the project from the GitHub repository. 3. Open the project in VS Code. 4. Install the required dependencies using: pip install -r requirements.txt 5. Train the machine learning model using: python train_model.py 6. Run the Flask application using: python app.py 7. Open http://127.0.0.1:5000/ in your web browser. 8. Enter the applicant details and click Predict to view the loan eligibility prediction result.

Code Quality Checklist

S.No	Criteria	Status (Yes / No)
1	Code is modular and organized into functions / classes	Yes
2	Meaningful variable and function names are used	Yes
3	Code includes comments / documentation where necessary	Yes
4	Error handling is implemented for critical operations	Yes
5	The application runs without critical errors	Yes
6	Code is committed to a version control repository	Yes

Additional Notes / Comments:

The Smart Lender application is developed using Python and Flask to predict loan approval eligibility based on applicant information. A Machine Learning model is trained using historical loan data and integrated with a simple web interface to provide real-time predictions. The project follows a modular structure and is maintained using GitHub for version control.
