Empathy Map

an empathy map to understand customer/user from four perspectives — what they Say, Think, Do, and Feel — in relation to the problem our project addresses. This helps the team build a customer-centric solution.

SAYS • "I just want to know quickly whether I qualify for this loan" • "Why does the bank need so many personal and financial details?" • "I hope this online system is more transparent than visiting a branch"		THINKS • "Will my income and credit history be good enough for approval?" • "I hope this prediction is accurate and not just a guess" • "What should I do next if I get rejected?"
	PERS ONA NAME Anita Sharma <i>(Loan Applicant)</i>	
DOES • Fills out the online loan application with personal and financial details • Compares the predicted result with what a bank officer told them earlier • Reapplies or visits the bank branch based on the prediction outcome		FEELS • Anxious while entering financial details, hoping for a positive outcome • Relieved and confident when the prediction shows approval • Frustrated or disheartened if rejected without a clear explanation
