

Project Executable Files

Date	12 July 2026
Team ID	
Project Name	Smart Lender
Maximum Marks	3 Marks

Project Executable Files

This section requires submission of all executable and deployable files for project. Ensure all files are properly organized, named, and uploaded to the specified submission platform. The evaluator must be able to run or deploy solution using the provided files and instructions.

Step 1: Submission Checklist

S.No	Item to Submit	Submitted
1	Complete source code (all files and folders)	Yes
2	README / Setup Guide (instructions to run the project)	Yes
3	requirements.txt / dependency file	Yes
4	Database schema / seed files (if applicable)	NA
5	Environment configuration file (.env.example or similar)	No
6	Deployed application URL (if hosted)	No
7	APK / Executable binary (if applicable)	NA
8	Dockerfile / Containerization config (if applicable)	NA
9	Test files and test results	Yes
10	Demo video or walkthrough	Yes

Step 2: File / Folder Structure

Provide an overview of project's file and folder structure below:

```
Project Code
|— app.py
|— train_model.py
|— model.pkl
|— requirements.txt
|— locustfile.py
|
|— dataset
|   └─ loan.csv
|
|— notebook
|   └─ model.py
|   └─ Smart_Lender.ipynb
|
|— static
|   └─ style.css
|
└─ templates
    └─ index.html
    └─ result.html
```

Step 3: Deployment / Access Details

Field	Details
Hosted / Deployed URL	Not Deployed
Login Credentials (Demo)	Not Required
Platform / Hosting Provider	GitHub Repository
Repository Link	https://github.com/Nimruja10/Smart-Lender/tree/main
Demo Video Link	https://drive.google.com/file/d/1AELtY-pPFQxqtltyvJEH-cLQjjxZClqb/view?usp=sharing

Step 4: Run Instructions

Provide clear, step-by-step instructions for the evaluator to run project locally:

Prerequisites

Required Software

Software	Version
Operating System	Windows 10/11, Linux, or macOS
Python	3.10 or later
Visual Studio Code	Latest Version
Git (Optional)	Latest Version
Google Chrome / Microsoft Edge	Latest Version

Python Library Versions

Library	Version
Flask	3.0.3
NumPy	1.26.4
Pandas	2.2.2
Scikit-learn	1.5.1
XGBoost	2.1.0
Matplotlib	3.9.0
Seaborn	0.13.2
SciPy	1.13.1
Jupyter	1.0.0
Notebook	7.2.1
pickle-mixin	1.0.2

System Requirements

Component	Minimum Requirement
Processor	Intel Core i3 (or equivalent)
RAM	4 GB (8 GB Recommended)
Storage	1 GB Free Disk Space
Internet	Required for installing dependencies
Browser	Google Chrome, Microsoft Edge, or Mozilla Firefox

Setup / Run Instructions

1. Install Python 3.x.
2. Download the project from the GitHub repository.
3. Open the project in VS Code.
4. Install the required dependencies using: `pip install -r requirements.txt`
5. Train the machine learning model using: `python train_model.py`
6. Run the Flask application using: `python app.py`
7. Open <http://127.0.0.1:5000/> in your web browser.
8. Enter the applicant details and click Predict to view the loan eligibility prediction result.

Step 5: Known Issues / Limitations

S.No	Known Issue / Limitation	Workaround / Status
1	The application is not deployed online.	Run the project locally using Flask.
2	Prediction accuracy depends on the training dataset.	Use the provided loan.csv dataset and execute train_model.py before running the application.
3	User authentication and database connectivity are not implemented.	Not required for this academic project
